

Bacchus Range Products

Paul & Celia Willoughby run Bacchus Range Products on their property 12km north of Mudgee.

Bacchus Range is the name of their property, Bacchus being the Roman god for wine and they overlook numerous vineyards of the Mudgee district. They run some stock; have a variety of fruit trees, nut trees, desert lime trees and wine grapes and vegetables.

Their distinctive product is the desert lime, a native bush that is drought hardy and frost tolerant.

They planted 100 desert limes in 2005 and grow up to 4m high. These are the fastest citrus in the world from flower to picking, 10–12 weeks, having a small white flower that grows into a green fruit becoming yellow on ripening to yellow. Harvesting is by hand and quite time consuming.

They have many different products some containing desert limes. The flavor of the desert lime makes them quite unique with no comparison or equal in the market place.

Product Range: Desert Lime Paste; Desert limes added to Apricot, Marmalade, cab Sav, mango and plum jams; Smokey Chutney; Autumn Chutney and Apple Sauce; Lemon Spread; Orange Spread; Blackberry Jam; Chilli Jelly and Chilli & Capsicum Relish; Tomato & Basil Sauce; BBQ Sauce and a hot BBQ sauce. They also offer a small gift pack of five sample products.
